

## PRICING INFORMATION

For initial consultations at the clinic we ask for pre-payment in advance as we do for endodontic (root filling) treatment. For all other treatments we ask for payment at the time the treatment is carried out and as a rule we do not take deposits or large sums of money in advance of treatment being undertaken. This is unusual as many dental practices in the UK take a percentage of costs in advance of treatment being carried out but we try to be as fair and trusting as possible with the patients that we treat and try to treat people as we would like to be treated ourselves. In some instances though, for large treatment plans, we will request that you make payment for initial stages, which are of high value and require considerable amounts of work being carried out in advance of the treatment day. This will be discussed with you fully. This also avoids embarrassment or confusion should there be issues with credit cards being declined or other aspects of payment being refused and we would be grateful if you'd be able to co-operate with this.

For patients wishing to pay large sums of money by cheque we request that this be paid at least one week in advance of the appointment to ensure that cleared funds are in place. For restorative aspects of treatment we respectfully request payment to be made during the construction of the device as we have to pay for those, as they are produced, not at the end of your treatment. So generally when making crowns, bridges or dentures for patients payment is requested at the start of construction.

Full details of your payment schedule for any treatment carried out will be explained in your consent letter. If you have any questions at any time please don't hesitate to speak to a member of the team.
